working environment and calculating the noise exposure level. This International Standard deals with A-weighted levels but is applicable also to C-weighted levels. Three different strategies for measurement are specified. The method is useful where a determination of noise exposure to engineering grade is required, e.g.

### **Safety and Health Topics | Occupational Noise Exposure**

Noise Exposure Safety Standards guide the measurement and assessment of noise levels, potentially leading to the determination that a noise safety program is required, or gauging the ongoing results of a noise safety program.
